

WHAT WE DO

Pre-Market Entry Compliance

CorreggioNET assists you in understanding the regulatory environment and meeting compliance requirements before entering a particular market. This service provides detailed regulatory information on market entry requirements, including licensing conditions for trading, shipping, and supplying power and natural gas.

Post-Market Entry Guidance

Once an energy undertaking is active in a specific market, CorreggioNET provides a one-stop-shop service, allowing you to meet constantly changing regulatory reporting obligations in multiple jurisdictions which are applicable for wholesale traders and shippers.

“One-stop-shop for European regulation and market rules compliance”

CorreggioNET is a web-based platform founded by Jan Haizmann in 2017 to help energy trading companies comply with European energy market regulations, ensuring subscribers stay informed and adaptable in a rapidly changing regulatory landscape.

-  **Real-time Updates:** CorreggioNET is constantly updated to reflect new reporting obligations, empowering subscribers to avoid non-compliance risks and associated penalties.
-  **Comprehensive Coverage:** With various national reporting duties categorized and translated into English, CorreggioNET serves as a one-stop shop for navigating compliance requirements in 31 European energy markets.
-  **Cost Savings:** By centralizing compliance information and eliminating the need for multiple advisors across different countries, CorreggioNET delivers substantial cost savings for its users.

CorreggioNET offers services to help energy trading companies better understand the energy regulatory market environment and to **stay compliant** by;

CN Monitoring Service

Enables subscribers to monitor regulatory obligations in the specific markets they are active in. It allows subscribers to keep an eye on their obligations as market participants with regular updates.

CN Alert Service

Alerts subscribers about existing regulatory obligations ahead of the compliance deadline. The service sends subscribers timely email alerts, providing 2 notifications prior to deadline.

CN Digest & SoS Report

Offers continuous regulatory updates and energy market developments through the monthly Correggio Regulatory Report. CN also offers a monthly SoS Gas Briefing Report on gas storage, supply security.

CN Hotline Service

Provides additional information on relevant compliance obligations through online engagement with a qualified regulatory specialist. Subscribers can expect to get response to their queries within 2 working days.
